

Posting Date: July 22, 2010

Job Title: Test Pilot
Department: Flight
Location: Edwards Air Force Base, CA
Grade: E12

Job Duties:

- Involved in all aspects of flight testing including: handling quality demonstration and research flights; upset recovery training flights in experimental aircraft including proposal preparation; experiment design; aircraft and systems preparation; flight test planning and implementation; data analysis, and technical report writing.
- Regularly contributes to the development of new concepts, techniques, and standards. Considered an expert in field within business group.
- Develops solutions to complex problems which require the regular use of ingenuity and innovation. Ensures solutions are consistent with business group and organizational objectives.
- Work is performed without appreciable direction. Exercises considerable latitude in determining objectives and approaches to assignments.
- Serves as consultant to management and special external spokesperson for the business group/functional organization on major matters pertaining to its policies, plans, and objectives.

Preferred education, experience, and skills include:

- Minimum five to 10 years progressive experience and responsibility as a test pilot in a flight organization.
- Experience with project management, flight testing and evaluations of aircraft stability and control, flying/handling qualities, flight control systems or other airborne systems.
- BS in Aeronautical or Aerospace Engineering (MS desirable), Test Pilot School graduate

Other Requirements:

- Pilot License - FAA Commercial, Multi-Engine, Instrument Rating.
- Must meet eligibility requirements for access to classified areas.
